OCTOBER 14 to 16 the annua. convention of the American Society of Municipal Improvement will be held in Chicago. This is an organization composed of municipal officials in all parts of the country.

A GERMAN doctor, who has been collecting information about the habits of long-lived persons, finds that the majority of those who attained old age indulged in late hours. Eight out of ten persons oven 80 never went to bed till well into the small hour, and did not get up again until late in the day.

THE prospective visit of the ezar 'o Breslau and Goelitz in order to witness the big fall maneuvers is considered of prime political importance. German politicians claim that the czar's presence at their maneuvers and the attendant fetes means a guarantee of peace and a check to the ambition of

THE big general maps of the United States, issued by the general land office for this year, have just been issued. The result of the work of engraving and printing is one of the most complete and finely executed sets yet issued by the government. The contract price is 62 cents each to the government.

A PORTABLE crematory for maitary purposes is to be introduced into continental armies. It has the appearance of an army baking oven, but is much higher and heavier, and is drawn by eight horses. It is intended for the disposal of the soldiers killed in battle. so as to avoid the danger of epidemics from the burial of great numbers of

KHEDIVE ABBAS of Egypt is declared to be on the point of abdication. He is rich and would infinitely prefer to live as his own master in Vienna or Paris than to continue in his present state of bondage. According to authoritative reports, he is at the present time haggling with the English government about the allowance ne is to receive if he abandons his throne.

ONE of the most remarkable echoes in the world is that produced by the suspension bridge across the Menai Straits, in Wales. The sound of a blow with a hammer on one of the main piers is returned in succession from each of the crossbeams which support the roadway; in addition to which the sound is many times repeated between the water and the roadway, at the rate of 28 times in five seconds.

THE richest gold placer mines of Alaska have been transferred to Canadian territory and miners are now paying miners' tax to British authorities. The territory in question is from three to eight miles in width, and embraces the rich placer claims on Glacier and Miller creeks, which heretofore were supposed to be in Alaska territory. The transfer of territory is the result of resurveys recently made.

THE voracity of the eagle and similar birds of prey is well known to naturalists, but it has been left to a Swiss hunter to define exactly the variations which take place in its daily menu. In a nest in the Alps, side by side with an eaglet, he found a hare freshly killed, 27 chamois' feet, four pigeons' feet, 30 pheasants' feet, 11 heads of fowls, 18 heads of grouse, and the remnants of rabbits, marmots and squirrels.

THE total amount of silver dollars coined from 1792 to 1873 (when the coinage was discontined) was 8.031,238. The amount coined from 1878 (when the coinage was restored by the Bland-Allison act) to June 30, 1896, was \$430,-790,041. Of the \$430,790,041 coined since February, 1878, there are now in the treasury \$378,614,043, and the silver outside of the treasury is \$52.174.998. Silver certificates to the amount of \$342,618,504 have been issued against that amount of silver dollars in the treasury.

THE underground electric railroad in London has proved so satisfactory that Londoners are now asking why they can not be relieved of the intolerable nuisance of the sulphurous and unwholesome fumes in which they have to pass the portion of the day occupied in going to and from business on the old Metropolitan railroad. This underground road has hitherto been equipped with soft-coal steam locomotives. It is expected that this will soon be really an electric line, and it is said that investigations are now being made with a view of devising.

THE emigration bill which will be introduced in the reichstag at the opening of the session is now drafted. A pan-American federation and a colonial council have been the determining factors in its framing. A central emigration bureau, assisted by an emigration council, will be created, emigration agents will be especially licensed, false information to emigrants as to their prospects will be made a punishable offense, and the encouragement of emigration among minors under certain conditions will be made punishable by imprisonment and a fine.

THE popular notion that mosquitoes are chiefly resident in tropical countries is quite a mistake, the home of the mightiest legions being within and about the Arctic circle. On coasting trips to the North cape even vessels are invaded by maddening swarms at every stopping place. It is reported that in Alaska they form clouds so dense that it is impossible for sportsmen to aim at objects beyond. Native dogs are sometimes killed by them, and even the great grizzly bear is said to be occasionally blinded by their attacks, and finally starved in conse-

SHORT OF WIND.

First of the International Yacht Races Falls Because of a Calm.

Toledo, O., Aug. 25.-The attempt to sail the first international race between the Canada and Vencedor for the interstate yachting championship on Lake Erie off Toledo, Menday, resulted in a failure on account of lack of wind, as the regatta committee declared the race off at three o'clock p. m. after the vachts had drifted about for four hours When the race was called the Canada. which had a lead of over a mile, had only covered six miles or about a quarter of the course and was half way between the first and second marks on the first round. The race was witnessed by a big crowd of spectators and nearly 100 steam and sailing craft followed the racers over the course. The Canadians were naturally greatly elated over the showing of their champion, while the yachtsmen on our side of the border were not pleased over the re-

As a matter of fact the original conditions have handicapped the Vencedor so that it will be little short of a miracle if she wins in a light wind, though she will undoubtedly do well in a blow As it is she is under-canvassed and can not do herself justice. The course was a triangular one of 12 miles, four miles to the leg, and sailed over twice, start ing by crossing an imaginary line drawn between a stake boat and the steam yacht Sigma, thence west by north half north to a stake boat anchored off Monroe pier, thence northeast to second stake boat, thence south by east quarter to east to starting point. The wind at three p. m. having dropped to a flat calm the regatta committee declared the race off for the day, as it was impossible to finish it within the required time limit. The vachts will sail over the same course to-day.

CHICAGO BANK FAILS.

Haymarket Produce Bank Unable to Meet Its Obligations.

Chicago, Aug. 25.—Unable to meet its obligations in the clearing house Saturday the Haymarket Produce bank early Monday morning made an assignment to Charles L. Boyd. According to the assignce the liabilities are about \$160, 000 and assets about the same. The bank is located at No. 143 Randolph street, in the center of Havmarket square. It is a corpora tion organized and run by Arthur H. Howe and Gustavus A. Bodenschatz, who made the capital stock \$50,000. Those interested say that the failure was unexpected by the bankers, while others claim that the concern has been in a shaky condition for some time. A large majority of the customers of the bank come from the garden truck farmers and their losses will be considerable.

Father and Son Killed.

Athens, O., Aug. 25.-John Debbs and his 14-year-old son met a horrible death Monday while engaged at their work. They were employed in a stone quarry at Trimble, blasting rocks, and had prepared a blast.
